

35 = (4, 0, 0) — AHMN's fermion, $|\lambda|$ even

60 = (0, 2, 1) — admissible, $|\lambda|$ odd

$V(\alpha_2+1) - V(\alpha_2) \equiv 0$ (period 1 holds)

$V(\alpha_2+1) - V(\alpha_2)$ max = 30% of scale
